

Step 1: https://downloads.haskell.org/~ghc/9.2.8/ghc-9.2.8-x86_64-unknown-mingw32-integer-simple.tar.xz

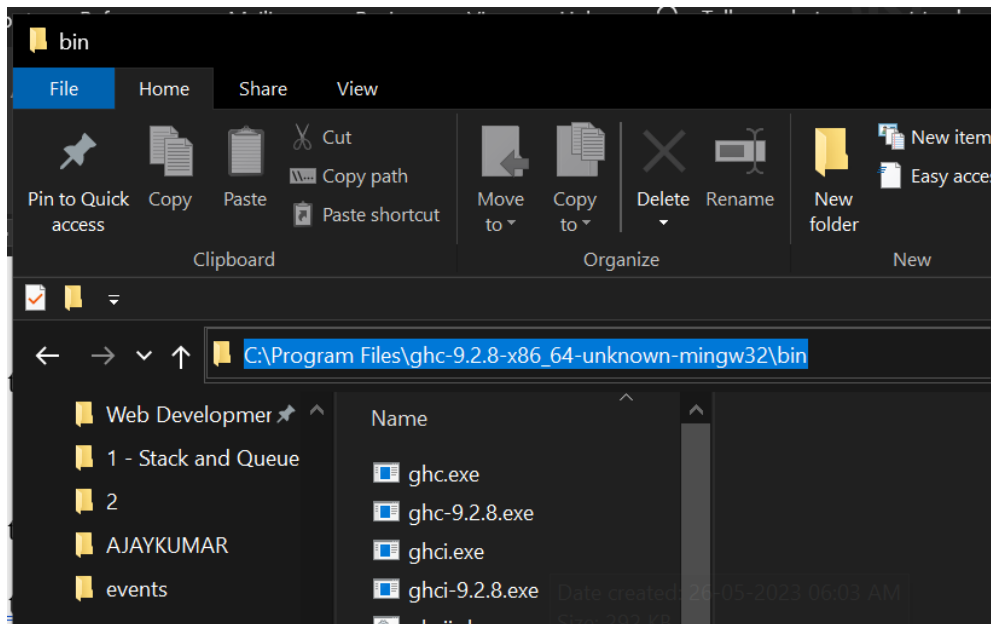

click on this link and download this

Step 2: download and install WinZip app

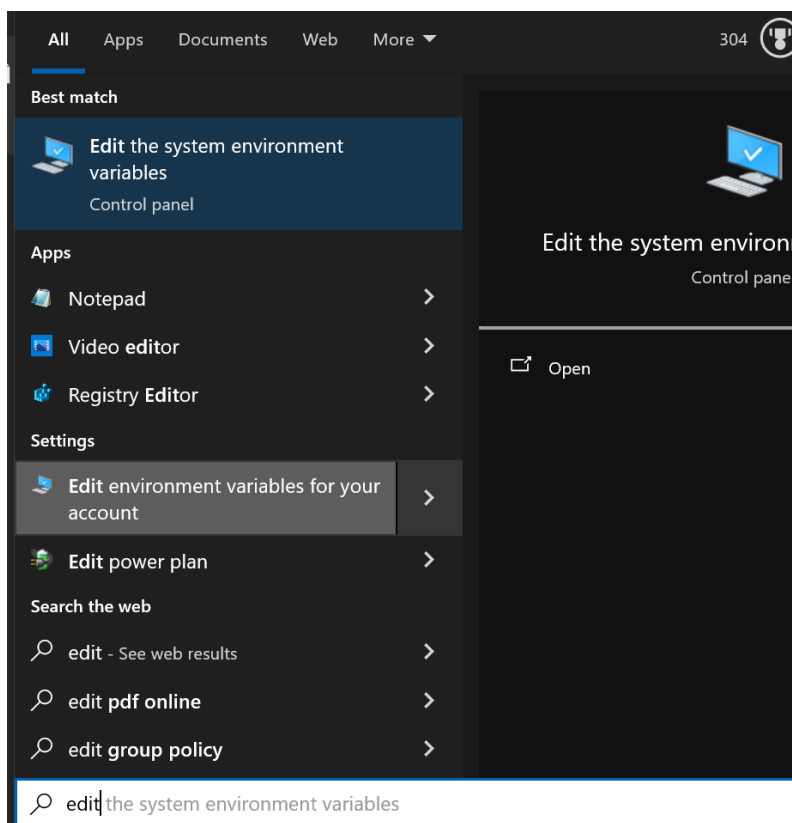

Step 3: use winzip to extract the downloaded file (from step 1)

Step 4: move the extracted folder (from step 3) to a safe place (like C:/Program Files)

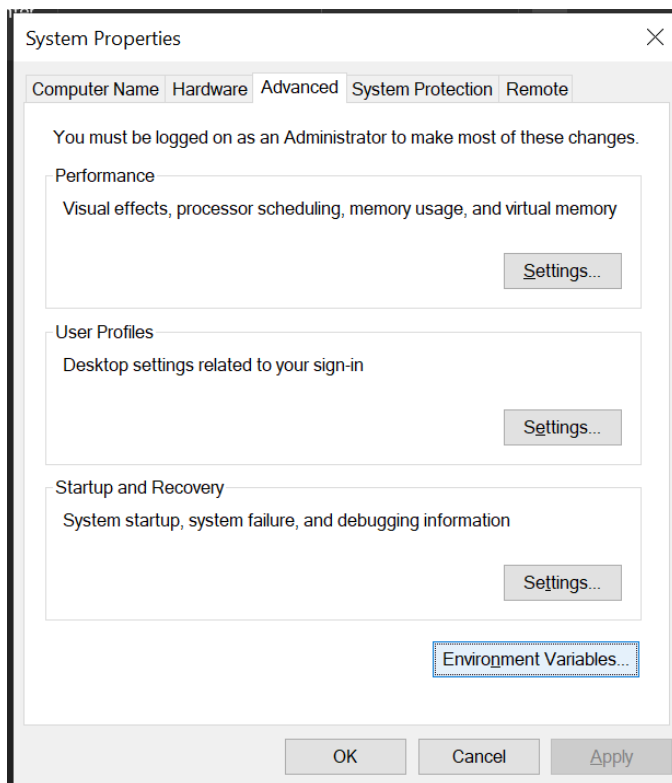

Step 5: inside the ghc folder open the ``bin`` folder and copy its path

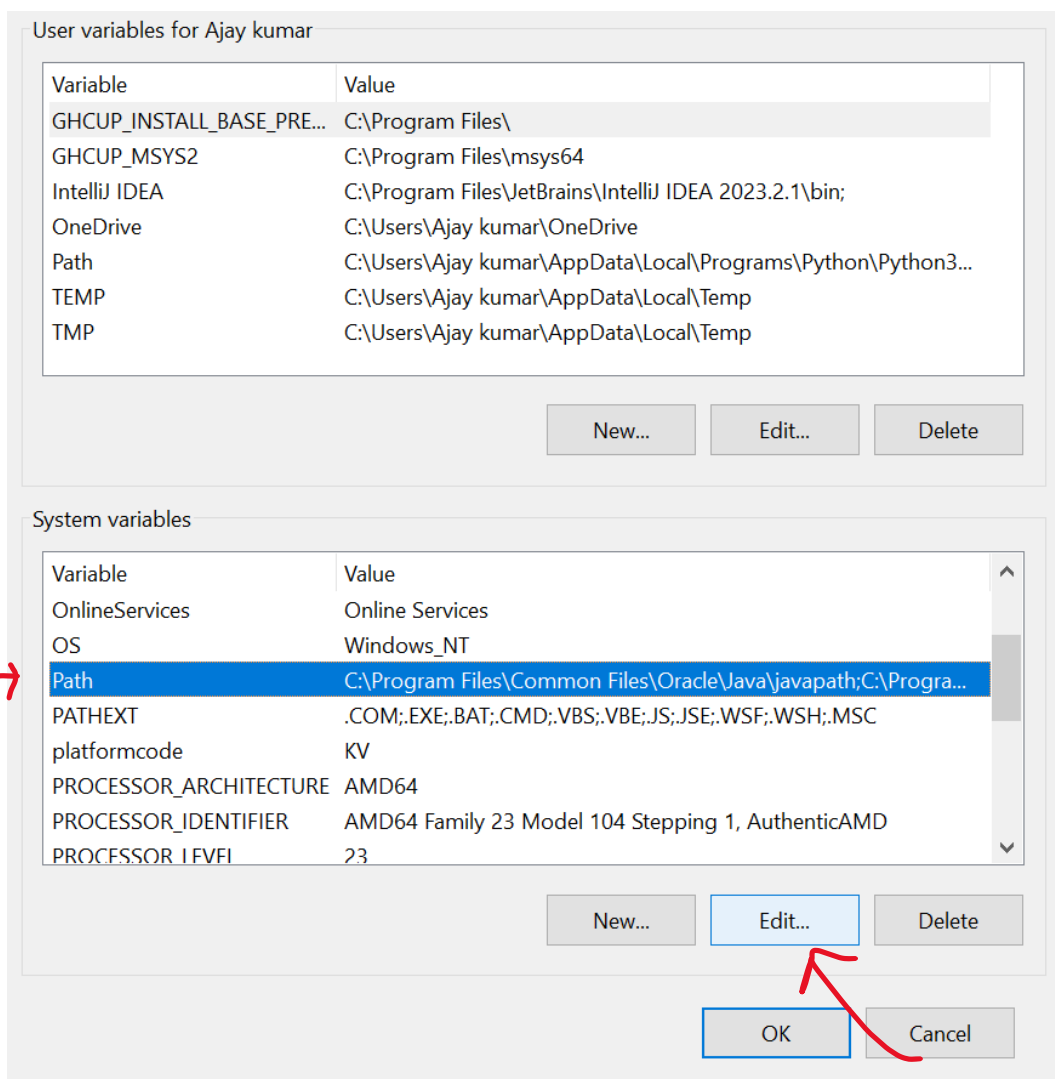

Step 6: Open start menu and search ``Edit the system environment variables``

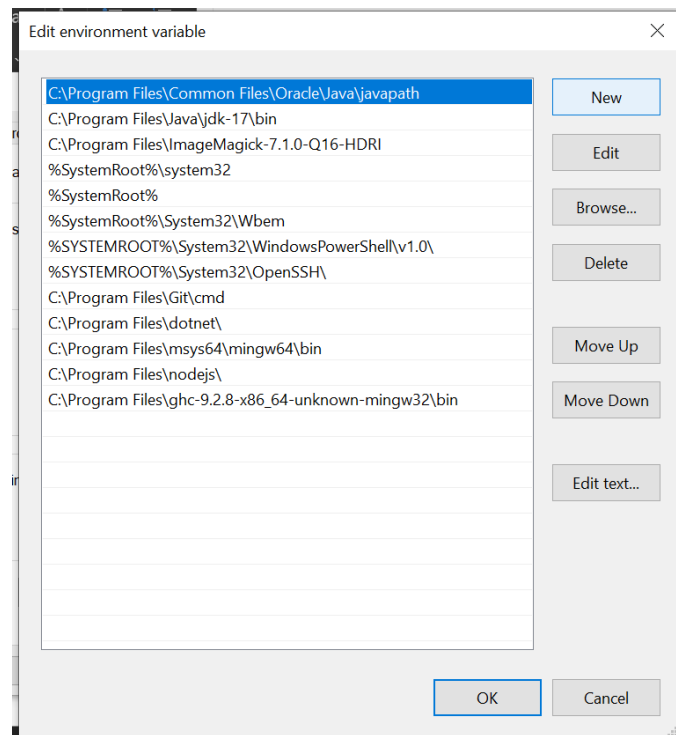

Step 7: Click on Environment Variables > Select Path from System variables

Step 8: Click on Path and the Edit

Step 9: Click on New, paste the path of the bin folder

Then press OK on everything.

MISSION SUCCESSFUL!!!
